FOR IMMEDIATE RELEASE

February 24, 2010

Rochester Hills, Michigan-based engineering services supplier DGE Inc. (www.dgeinc.com) and electronics manufacturer Invotronics, Inc. of Scarborough, Ontario (www.invotronics.com) today announced a strategic alliance based on a shared vision and complementary capabilities and strengths. DGE will provide electronics hardware and software design services, including test system development, to augment and enhance Invotronics' electronics manufacturing expertise.

By engaging the companies at the technology, marketing and business levels, the alliance will allow both companies to drive new growth through expanded skill sets and shared business opportunities.

DGE and Invotronics share a commitment to quality and to continuous improvement and hold ISO 9001, QS 9000, TS 16949, ISO 14001, OHSAS 18001, and ISO 17025 and other accreditations.

"This strategic alliance will allow us to offer a 'one-stop-shop' solution to OEM, Tier 1, and aftermarket companies looking for a medium to high volume control module solution provider of the highest quality, and further strengthen our product and service offerings," says DGE COO Stephan Tarnutzer.

"This alliance with DGE greatly expands Invotronics' depth and technical capabilities. It increases Invotronics' range of services, including hardware and software design, engineering, testing, and complete product development," says Invotronics CEO Earl Hughson.

DGE Inc., founded in 1984, provides electrical engineering design and consulting services to automotive OEMs and Tier 1 suppliers. The company has extensive experience and expertise in integrating products into OEM vehicles. Focusing on the entire vehicle system, DGE delivers innovative and cost-effective solutions to complex customer challenges. Its strengths include system integration, embedded software development, electronics hardware design, vehicle networking, telematics, OEM specifications and requirements, custom test systems, and verification and validation of electronics. The company also offers OEM product development advisory services and project management and coordination services. In addition to automotive, DGE serves the military, consumer electronics and alternative energy industries.

InvoTronics, Inc. has a 20-year history of providing high-reliability electronics manufacturing services to OEM clients in the automotive, industrial, and telematics industries. Located in Scarborough, Ontario, InvoTronics is equipped to handle both quick-turn, small production runs and large-scale volume manufacturing. The company has a strong background in serving automotive OEM and Tier 1 suppliers, as well as non-automotive clients in a variety of industries. The company specializes in high-quality products which are built to be reliable under severe outdoor operating conditions. In addition to board level assembly, the company offers value-added services including materials procurement, mechanical assembly, and final integration.
